

Name: ..... Class: .....

Write an equation from words

Write the following sentences below as an equation.

1. 726 is the difference of 900 and t.

2. v equals the sum of 159 and v, multiplied by 10.

3. 250 divided by u is equal to the product of 236 and r.

4. 592 subtracted from t is 0.

5. 10 added to r times 200 is equal to the product of r and 20.

6. The product of j and 50 plus 89 is equal to t.

7. The quotient of t and 27 is equal to 9.

8. 17 added to b is equal to 342 plus s times 5.

Write an equation from words

Write the following sentences below as an equation.

1. 726 is the difference of 900 and t.

$$900 - t = 726$$

2. v equals the sum of 159 and v, multiplied by 10.

$$(159 + v) \times 10 = v$$

3. 250 divided by u is equal to the product of 236 and r.

$$250/u = 236 \times r$$

4. 592 subtracted from t is 0.

$$t - 592 = 0$$

5. 10 added to r times 200 is equal to the product of r and 20.

$$(10 + r) \times 200 = 20 \times r$$

6. The product of j and 50 plus 89 is equal to t.

$$50j + 89 = t$$

7. The quotient of t and 27 is equal to 9.

$$t/27 = 9$$

8. 17 added to b is equal to 342 plus s times 5.

$$17 + b = 342 + 5s$$
