Area of triangles.

1. What is the area of the triangle below ?

2. What is the value of S if the area of the triangle is 20 square yards ?

Name: ..... Class: .....

## Area of triangles.

1. What is the area of the triangle below ?

$$\text{Area of triangle} = \frac{1}{2} \text{ base} \times \text{height}$$

Base = 8 miles

Height = 4.5 miles

Using the formular above we have,

$$\frac{1}{2} \times 8 \times 4.5$$

$$4 \times 4.5 = 18 \text{ miles}$$

Therefore, the area is 18 square miles

2. What is the value of S if the area of the triangle is 20 square yards ?

$$\text{Area of triangle} = \frac{1}{2} \text{ base} \times \text{height}$$

Area = 20 square yards

Base = S

Height = 8 yards

Using the formular above we have,

$$20 = \frac{1}{2} \times S \times 8$$

$$S = \frac{20 \times 2}{8}$$

$$S = \frac{40}{8} = \frac{5 \times 8}{8}$$

$$S = 5 \text{ yards}$$

Therefore, S = 5 yards
