

Name: ..... Class: .....

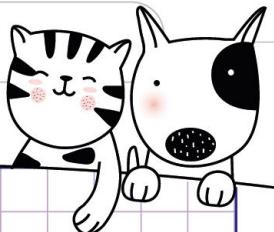

### Roman numerals

**Note : Roman numeral symbols**

1	5	10	50	100	500	1000
I	V	X	L	C	D	M

To read a roman numeral, you go from left to right.

- Also, subtract smaller symbol values that are placed before larger symbol values.
- Furthermore, add smaller symbol values that are placed after large symbol values.

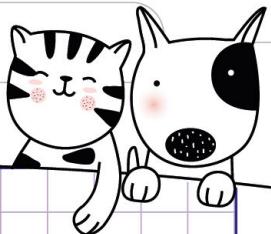

a) Complete the table below;

number	Roman numerals
3	
49	
50	L
	CCCXIX
	CLVIII
	DCCXXXIX
260	
9	
	MDCXLI

a) Convert XDLXIV to digits.

## Roman numerals

## Note : Roman numeral symbols

1	5	10	50	100	500	1000
I	V	X	L	C	D	M

To read a roman numeral, you go from left to right.

- Also, subtract smaller symbol values that are placed before larger symbol values.
- Furthermore, add smaller symbol values that are placed after large symbol values.

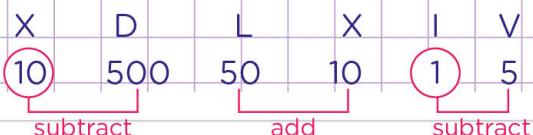

## a) Complete the table below;

number	Roman numerals
3	III
49	XLIX
50	L
319	CCCXIX
158	CLVIII
739	DCCXXXIX
260	CCLX
9	IX
1,641	MDCXLI

## a) Convert XDLXIV to digits.

Let's first of all find the values of each symbol

Then, let's check if a smaller number is placed before a larger number and vice versa.

Finally ,let's perform the evaluation

$$\begin{aligned}
 \text{XDLXIV} &= (500 - 10) + (50 + 10) + (5 - 1) \\
 &= 450 + 60 + 4 \\
 &= 514
 \end{aligned}$$

So, XDLXIV = 514
