## Convert from expanded form to standard form

a) Write down  $90,000 + 6,000 + 500 + 90 + 7$  in standard form.

b) Write down  $5,000 + 100 + 70 + 3$  in standard form.

c) Write down  $300,000 + 2,000 + 400 + 50 + 9$  in standard form.

d) Write down  $600,000 + 70,000 + 9,000 + 5$  in standard form.

## Convert from expanded form to standard form

a) Write down  $90,000 + 6,000 + 500 + 90 + 7$  in standard form.

Let's try to separate each number into its corresponding place value.

 $90,000 = 9$  ten - thousands $6,000 = 6$  thousands $500 = 5$  hundreds $90 = 9$  tens $7 = 7$  ones

Now, use the place value chart to place the values above

Thousands				
TTh	Th	H	T	O
9	6	5	9	7

So, the expression in standard form = **96,597**b) Write down  $5,000 + 100 + 70 + 3$  in standard form.

Let's try to separate each number into its corresponding place value.

 $5,000 = 5$  thousands $100 = 1$  hundreds $70 = 7$  tens $3 = 3$  ones

Now, use the place value chart to place the values above

Th	H	T	O
5	1	7	3

So, the expression in standard form = **5,173**c) Write down  $300,000 + 2,000 + 400 + 50 + 9$  in standard form.The expression in standard form = **302,459**d) Write down  $600,000 + 70,000 + 9,000 + 5$  in standard form.The expression in standard form = **679,005**
