Class:

Counting equal groups

Describe the following models by completing the sentences.

1.

The model has _____ equal groups with _____ dots in each group.

2.

The model has _____ equal groups with _____ triangles in each group.

3.

The model has _____ equal groups with _____ squares in each group.

4.

The model has _____ equal groups with _____ circles in each group.

Name:

Class:

Counting equal groups

Describe the following models by completing the sentences.

1.

Let's first of all count the number of equal groups.

You see that, there are 3 equal groups.

Finally, let's count the number of dots/objects in each group

you see that, there are 4 dots in each group.

Therefore, the model has 3 equal groups with 4 dots in each group.

2.

The model has 6 equal groups with 5 triangles in each group.

3.

The model has 5 equal groups with 8 squares in each group.

4.

The model has 2 equal groups with 4 circles in each group.
