How to write multiplication expressions using number lines

Write multiplication expressions that describe the number lines below.

Let's interpret the number line.

You see that, we skip counted 3 times by 4 and ended at 12 on the number line.

So, the expression is  $3 \times 4 = 12$

\_\_\_ x \_\_\_ = \_\_\_

\_\_\_ x \_\_\_ = \_\_\_

\_\_\_ x \_\_\_ = \_\_\_

\_\_\_ x \_\_\_ = \_\_\_

## How to write multiplication expressions using number lines

Write multiplication expressions that describe the number lines below.

Let's interpret the number line.

You see that, we skip counted 3 times by 4 and ended at 12 on the number line.

So, the expression is  $3 \times 4 = 12$ 

$$\underline{\quad} \times \underline{\quad} = \underline{\quad} \longrightarrow 2 \times 4 = 8$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad} \longrightarrow 6 \times 5 = 30$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad} \longrightarrow 3 \times 3 = 9$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad} \longrightarrow 6 \times 2 = 12$$
