	4 th	20	21	22	23	24	25	26	
	5 th	27	28	29	30				

a. What day of the week is September 18 from the calendar above?

From the calendar, you see that, september 18 is a Friday.

b. How many days are there in this month?

From the calendar, you see that there are 30 days in this month.

c. How many weeks are there in this month?

From the calendar, you see that the days count from the 1st to the 5th week of the month but, we know that 1 week = 7 days

$$\begin{aligned} \text{So, number of weeks in the month of september 2020} &= 30 \text{ days} \div 7 \text{ days} \\ &= \left(\frac{30}{7}\right) \text{ weeks} \\ &= 4 \text{ weeks } 2 \text{ days} \end{aligned}$$

d. What day is actually 2 weeks after the 12 of september 2020?

We know that,

$$1 \text{ week} = 7 \text{ days}$$

$$\text{So, } 2 \text{ weeks} = \left(\frac{7 \times 2}{1}\right) \text{ days}$$

$$= 14 \text{ days}$$

Now let's count 14 days after september 12 to find the date after 2 weeks.

From the calendar, day 14 is exactly on Saturday 26.
