Estimate Sums

Estimate the sum of the expressions below

1.  $7,629 + 10,721$  is approximately equal to \_\_\_\_\_

2.  $25,925 + 52,790$  is approximately equal to \_\_\_\_\_

3.  $82,560 + 9,999$  is approximately equal to \_\_\_\_\_

4.  $71,192 + 98,935$  is approximately equal to \_\_\_\_\_

## Estimate Sums

Estimate the sum of the expressions below

1.  $7,629 + 10,721$  is approximately equal to \_\_\_\_\_

(Round each number to the nearest thousand)

$7,629 \longrightarrow 8,000$

$10,721 \longrightarrow 11,000$

$8,000 + 11,000 \cong 19,000$

So,  $7,629 + 10,721$  is approximately equal to 19,0002.  $25,925 + 52,790$  is approximately equal to \_\_\_\_\_

(Round each number to the nearest thousand)

$25,925 \longrightarrow 30,000$

$52,790 \longrightarrow 50,000$

$30,000 + 50,000 \cong 80,000$

So,  $25,925 + 52,790$  is approximately equal to 80,0003.  $82,560 + 9,999$  is approximately equal to \_\_\_\_\_

(Round each number to the nearest thousand)

$82,560 \longrightarrow 80,000$

$9,999 \longrightarrow 10,000$

$80,000 + 10,000 \cong 90,000$

So,  $82,560 + 9,999$  is approximately equal to 90,0004.  $71,192 + 98,935$  is approximately equal to \_\_\_\_\_

(Round each number to the nearest ten-thousand)

$71,192 \longrightarrow 70,000$

$98,935 \longrightarrow 100,000$

$70,000 + 100,000 \cong 170,000$

So,  $71,192 + 98,935$  is approximately equal to 170,000
