## mathskills4kids

	Name:		Class:
	Estima	te products: multiply by 2-d	ligit numbers
E	stimate the following e	expressions.	
1.	875 x 25 is about	( round each number to the	e nearest ten).
	Let's round each number	to the nearest ten, then multiply.	
	875 x 25 = 8 8 0		
	x 30		
	880 x 30 = 0 0 0		
	2, 6 4 0 0		
	2, 6 4 0 0	So, 875 x 25 is about 26,40	00
2.	628 x 23 is about	( round each number to th	e nearest ten).
	Let's round each number	to the nearest ten, then multiply.	
	628 x 23 = 6 3 0		
	x 20		
	630 x 20 = 0 0 0		
	12,600		
	12,600	So 875 x 25 is about 26,40	0
3.	Estimate and tick the	correct answer (round each nur	mbor to the pogrest top)
	36 x 57 is about	Correct answer (round each nur	Hoer to the hearest terry.
	2,052 1,500	2,400 1,710	
	83 x 279 is about		
	83 X 2/9 IS about	<del></del>	
	22,400 23,	,240 23,157 21,60	0
	467 x 21 is about		
	9,807 9,2	200 🗹 9,400 🔲 9,340
