

Name: Class:

Count coins and bills up to \$20 bill

Note: - Penny = 1 cent or \$0.01
 - Nickel = 5 cents or \$0.05
 - Dime = 10 cents or \$0.10
 - Quarter = 25 cents or \$0.25

Count the following bills and coins.

Write the sum of the following, bills and coins

Name: Class:

Count coins and bills up to \$20 bill

Note: - Penny = 1 cent or \$0.01 - Dime = 10 cents or \$0.10
 - Nickel = 5 cents or \$0.5 - Quater = 25 cents or \$0.25

Count the following bills and coins.

Let's first of all add the values of the bills.

Sum of bills = \$10 + \$5 = \$15

Secondly, let's add the values of the coins in dollars

A penny = \$0.01 A quater = \$0.25

Sum of coins = \$0.01 + \$ 0.25 = \$0.26

Finally let's add bills and coins.

\$15 + \$0.26 = \$15.26

A penny = \$0.01

A dime = \$0.10 and we have 2 so, $2 \times 0.10 = \$0.2$

A 20 dollar + 1 dollar = \$21

A nickel = 0.5

So, to get the overall total let's add

$\$0.01 + 0.2 + 21 + 0.5 = \$ 21.71$

Write the sum of the following, bills and coins

\$42

\$15.60

\$1.31

\$17

\$31

\$80.5
