

Name: Class:

Model decimals and fractions

a. Display $\frac{8}{100}$ by coloring the model below.

b. Display 1.5 by coloring the model.

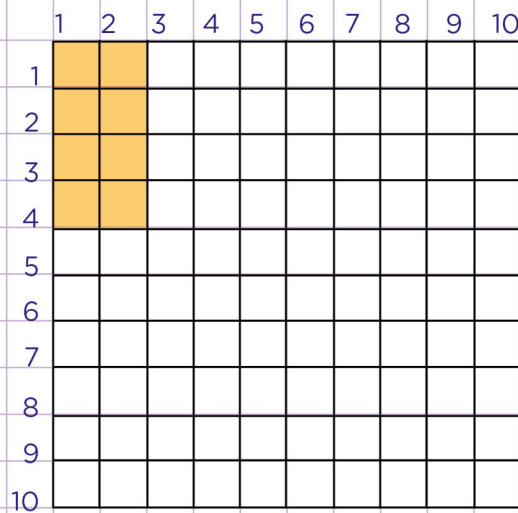

Name: Class:

Model decimals and fractions

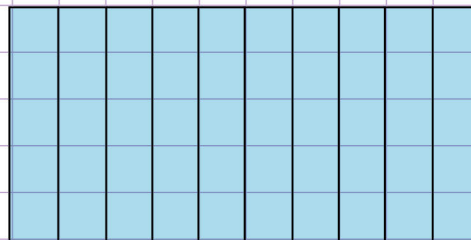

- a. Display $\frac{8}{100}$ by coloring the model below.

The model has 10 rows
and 10 columns.
So there are $10 \times 10 =$
100 parts.
Shade or color any 8
parts to show

- b. Display 1.5 by coloring the model.

Let's start by writing
1.5 as a mixed
number whose part has
a denominator
of 10.

$$1.5 = 1\frac{5}{10}$$

Now, color 1 whole of
the model and
color any other 5 parts
to show $\frac{5}{10}$
