a.

b.

c.

d.

Unit rate is a measure of a part with respect to a whole.  Peter has 50 cows in his 5 animal farms. What is the unit rate? The unit rate will be the number of cows peter has in 1 animal farm.  If 5 animal farms have 50 cows, Then, 1 animal farm will have 50 x 1 cows, = 10 cows  So, the unit rate is 10 cows per farm  Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate? The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves, Then in 1 hour, she will bake 40 x 1 loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate? The unit rate will be the number of people per bus if 4 buses have a total number of 192 people. Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate? The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles, Then in 1 hour, she will travel 705 x 1 miles, = 141 miles  So, the unit rate is 141 miles per hour	Name:	Class:
Peter has 50 cows in his 5 animal farms. What is the unit rate?  The unit rate will be the number of cows peter has in 1 animal farm.  If 5 animal farms have 50 cows.  Then, 1 animal farm will have 50 x 1 cows, = 10 cows  So, the unit rate is 10 cows per farm  Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate?  The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves,  Then in 1 hour, she will bake 40 x 1 loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people,  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles. = 141 miles	Unit rates and equivale	nt rates
Peter has 50 cows in his 5 animal farms. What is the unit rate?  The unit rate will be the number of cows peter has in 1 animal farm.  If 5 animal farms have 50 cows.  Then, 1 animal farm will have 50 x 1 cows, = 10 cows  So, the unit rate is 10 cows per farm  Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate?  The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves,  Then in 1 hour, she will bake 40 x 1 loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people,  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles. = 141 miles		
The unit rate will be the number of cows peter has in 1 animal farm.  If 5 animal farms have 50 cows.  Then, 1 animal farm will have 50 x1 cows, = 10 cows  So, the unit rate is 10 cows per farm  Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate?  The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves,  Then in 1 hour, she will bake 40 x loaves,  Then in 1 hour, she will bake 40 x loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people.  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	Unit rate is a measure of a part with re	spect to a whole.
The unit rate will be the number of cows peter has in 1 animal farm.  If 5 animal farms have 50 cows.  Then, 1 animal farm will have 50 x1 cows, = 10 cows  So, the unit rate is 10 cows per farm  Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate?  The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves,  Then in 1 hour, she will bake 40 x loaves,  Then in 1 hour, she will bake 40 x loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people.  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	Peter has 50 cows in his 5 animal farms. What is the u	unit rate?
If 5 animal farms have 50 cows, Then, 1 animal farm will have $\frac{50 \times 1}{5}$ cows, = 10 cows  So, the unit rate is 10 cows per farm  Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate? The unit rate will be the number of loaves baked per hour. If in 8 hours she baked 40 loaves, Then in 1 hour, she will bake $\frac{40 \times 1}{8}$ loaves = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate? The unit rate will be the number of people per bus if 4 buses have a total number of 192 people, Then, 1 bus will have $\frac{192 \times 1}{4}$ people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate? The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles, Then in 1 hour, she will travel $\frac{705 \times 1}{5}$ miles, = 141 miles		
Then, 1 animal farm will have $\frac{50 \times 1}{5}$ cows, = 10 cows  So, the unit rate is 10 cows per farm  Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate?  The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves, Then in 1 hour, she will bake $\frac{40 \times 1}{8}$ loaves = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate? The unit rate will be the number of people per bus if 4 buses have a total number of 192 people, Then, 1 bus will have $\frac{192 \times 1}{4}$ people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate? The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles, Then in 1 hour, she will travel $\frac{705 \times 1}{5}$ miles, = 141 miles		
So, the unit rate is 10 cows per farm  Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate?  The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves,  Then in 1 hour, she will bake 40 x 1 loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people,  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles		
Mrs. Patience baked 40 loaves of bread in 8 hours. What is the unit rate?  The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves, Then in 1 hour, she will bake 40 x 1 loaves = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate? The unit rate will be the number of people per bus if 4 buses have a total number of 192 people, Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate? The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles, Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	5	
The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves,  Then in 1 hour, she will bake \( \frac{40 \times 1}{8} \) loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people,  Then, 1 bus will have \( \frac{192 \times 1}{4} \) people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel \( \frac{705 \times 1}{5} \) miles, = 141 miles	So, the unit rate is 10 cows per farm	
The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves,  Then in 1 hour, she will bake \( \frac{40 \times 1}{8} \) loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people,  Then, 1 bus will have \( \frac{192 \times 1}{4} \) people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel \( \frac{705 \times 1}{5} \) miles, = 141 miles		
The unit rate will be the number of loaves baked per hour.  If in 8 hours she baked 40 loaves,  Then in 1 hour, she will bake \( \frac{40 \times 1}{8} \) loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people,  Then, 1 bus will have \( \frac{192 \times 1}{4} \) people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel \( \frac{705 \times 1}{5} \) miles, = 141 miles		
If in 8 hours she baked 40 loaves, Then in 1 hour, she will bake $\frac{40 \times 1}{8}$ loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate? The unit rate will be the number of people per bus if 4 buses have a total number of 192 people, Then, 1 bus will have $\frac{192 \times 1}{4}$ people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate? The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles, Then in 1 hour, she will travel $\frac{705 \times 1}{5}$ miles, = 141 miles	Mrs. Patience baked 40 loaves of bread in 8 hours. Wh	nat is the unit rate?
If in 8 hours she baked 40 loaves, Then in 1 hour, she will bake $\frac{40 \times 1}{8}$ loaves, = 5 loaves  So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate? The unit rate will be the number of people per bus if 4 buses have a total number of 192 people, Then, 1 bus will have $\frac{192 \times 1}{4}$ people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate? The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles, Then in 1 hour, she will travel $\frac{705 \times 1}{5}$ miles, = 141 miles	The unit rate will be the number of loaves baked per ho	our.
So, the unit rate is 5 loaves per hour  There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people,  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	If in 8 hours she baked 40 loaves,	
There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people, Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles, Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	Then in 1 hour, she will bake $40 \times 1$ loaves, = 5 loaves	
There are a total of 192 people in 4 buses. What is the unit rate?  The unit rate will be the number of people per bus if 4 buses have a total number of 192 people, Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles, Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	8	
The unit rate will be the number of people per bus  if 4 buses have a total number of 192 people,  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour  if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	So, the unit rate is 5 loaves per hour	
The unit rate will be the number of people per bus  if 4 buses have a total number of 192 people,  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour  if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles		
The unit rate will be the number of people per bus  if 4 buses have a total number of 192 people,  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour  if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles		
if 4 buses have a total number of 192 people,  Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	There are a total of 192 people in 4 buses. What is the	unit rate?
Then, 1 bus will have 192 x 1 people, = 48 people  So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	The unit rate will be the number of people per bus	
So, the unit rate is 48 people per bus  Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	if 4 buses have a total number of 192 people,	
Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	Then, 1 bus will have 192 x 1 people, = 48 people	
Lily travels 705 miles in 5 hours. What is the unit rate?  The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	4	
The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel $\frac{705 \times 1}{5}$ miles, = 141 miles	So, the unit rate is 48 people per bus	
The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel $\frac{705 \times 1}{5}$ miles, = 141 miles		
The unit rate will be the number of miles Lily will travel per hour if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel $\frac{705 \times 1}{5}$ miles, = 141 miles		
if in 5 hours Lily travels 705 miles,  Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	Lily travels 705 miles in 5 hours. What is the unit rate?	
Then in 1 hour, she will travel 705 x 1 miles, = 141 miles	The unit rate will be the number of miles Lily will travel	per hour
