Name: .... Class: ....

Compare and convert customary units of weight

a. Which is larger, 200 pounds or 1 ton?

☐ 1 ton ☐ 2000 pounds ☑ they are equal

We know that, 1 ton = 2000 pounds.
So, 1 ton and 200 pounds are equal

b. Which is larger, 12 ounces or 1 pound?

☑ 1 pound ☐ 12 ounces ☐ they are equal

16 ounces is equal to 1 pound.
So, 1 pound is more than 12 ounces

c. Convert 10 tons to pounds.

if 1 ton = 2000 pounds,
therefore, 10 tons = 2000 x 10
= 20, 000 pounds
So, 10 tons is equal to 20, 000 pounds.

d. Which is larger, 48 ounces or 2 pounds?

☑ 2 pounds ☐ 48 ounces ☐ they are equal

if 1 pound = 16 ounces,
So, 2 pounds = (2 x 16) ounces
= 32 ounces
Therefore, 48 ounces is more than 2 pounds

e. Convert 5 tons to pounds.

if 1 ton = 2000 pounds,
therefore, 5 tons = 2000 x 5
= 10, 000 pounds
So, 5 tons is equal to 10, 000 pounds.
