

Name: Class:

Choose the appropriate metric unit of measure

1. Choose a better estimate for the length of a chocolate bar?

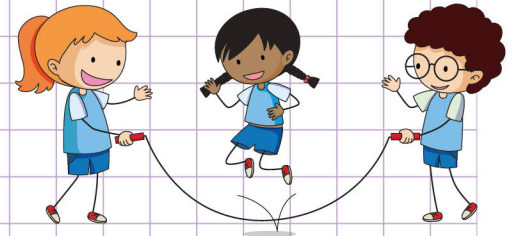

☐ 20 meters

☐ 20 centimeters

2. Choose a better estimate for the length of a bed sheet?

☐ 3 kilometers

☐ 3 meters

3. Choose a better estimate for amount and volume of water used to water the lawn?

☐ 30 liters

☐ 30 milliliters

4. Choose a better estimate for the weight of a paperclip?

☐ 2 kilograms

☐ 2 grams

5. Choose a better estimate for the Length of a lizard

☐ 18 millimeters

☐ 18 meters

6. Choose a better estimate for the width of a computer monitor?

☐ 50 centimeters

☐ 50 millimeters.

Name: Class:

Choose the appropriate metric unit of measure

1. Choose a better estimate for the length of a chocolate bar?

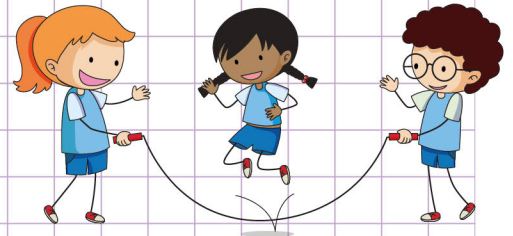

☐ 20 meters☒ 20 centimeters

20 centimeters is a better estimate. 20 meters is too long

2. Choose a better estimate for the length of a bed sheet?

☐ 3 kilometers☒ 3 meters

3 meters is a better estimate, 3 kilometers is too long.

3. Choose a better estimate for amount and volume of water used to water the lawn?

☒ 30 liters☐ 30 milliliters

30 liters is a better estimate, 30 milliliters is too small

4. Choose a better estimate for the weight of a paperclip?

☐ 2 kilograms☒ 2 grams

2 grams is the better estimate, 2 kilograms is too big.

5. Choose a better estimate for the Length of a lizard

☒ 18 millimeters☐ 18 meters

18 millimeters is a better estimate, 18 meters is too long.

6. Choose a better estimate for the width of a computer monitor?

☒ 50 centimeters☐ 50 millimeters.
