## Perimeter

Perimeter is the sum of all the side lengths

Find the perimeter of the figures below. Write your answer as a fraction or whole, or decimal number.

A.

Perimeter = sum of all side lengths

$$\text{Perimeter} = 5.7\text{ft} + 5.7\text{ft} + 5.7\text{ft}$$

$$\text{perimeter} = 17.1\text{ft}$$

So, the perimeter is 17.1 ft

B.

Perimeter = sum of all side lengths

$$\text{Perimeter} = 4.3\text{ in} + 3\text{ in} + 5\frac{1}{2} ( 5.5 ) \text{ in}$$

$$\text{perimeter} = 4.3\text{ in} + 3\text{ in} + 5.5\text{ in}$$

$$\text{perimeter} = 12.8\text{ in}$$

So, the perimeter is 12.8 in

C.

Perimeter = sum of all side lengths

$$\text{Perimeter} = 5.2\text{m} + 13.7\text{ m} + 13.7\text{m} + 5.2\text{ m}$$

$$\text{perimeter} = 37.8\text{ m}$$

So, the perimeter is 37.8 m
