Perimeter

Find the perimeter of each figure below.

Name: Class:

Perimeter

Find the perimeter of each figure below.

You find the perimeter by adding all the lengths of the sides.
Add the lengths of the sides:

$$8\text{ m} + 5\text{ m} + 8\text{ m} + 5\text{ m} = 26\text{ m}$$

So, the perimeter is 26 m

You find the perimeter by adding all the lengths of the sides.
Add the lengths of the sides:

$$9\text{ m} + 5\text{ m} + 7\text{ m} = 21\text{ m}$$

So, the perimeter is 21 m

You find the perimeter by adding all the lengths of the sides.
Add the lengths of the sides :

$$3\text{ in} + 9\text{ in} + 9\text{ in} + 10\text{ in} = 31\text{ in}$$

So, the perimeter is 31 in

You find the perimeter by adding all the lengths of the sides.
Add the lengths of the sides :

$$8\text{ ft} + 23\text{ ft} + 8\text{ ft} + 20\text{ ft} = 59\text{ ft}$$

So, the perimeter is 59 ft
