### Fractions of whole numbers I

1. Multiply and simplify your answer as much as possible.
   \[
   6 \times \frac{10}{15} = \frac{6}{1} \times \frac{10}{15} = \frac{60}{15} = 4
   \]
   Therefore, \(6 \times \frac{10}{15} = 4\)

2. Multiply and write your answer as a mixed number.
   \[
   6 \times \frac{5}{12} = \]

3. Multiply and give the answer as a mixed number.
   \[
   6 \times \frac{5}{12} = \]

4. Multiply and give the answer as an improper fraction.
   \[
   4 \times \frac{21}{29} = \]

5. Multiply and give the answer as a mixed number.
   \[
   150 \times \frac{5}{9} = \]

6. Multiply and give the answer as a whole number.
   \[
   10 \times \frac{9}{10} = \]

7. Multiply and give the answer as a mixed number.
   \[
   50 \times \frac{5}{8} = \]

8. Multiply and write your answer as a mixed number.
   \[
   375 \times \frac{7}{10} = \]

9. Multiply and give the answer as a whole number.
   \[
   759,000 \times \frac{4}{5} = \]

10. Multiply and write your answer as a mixed number.
    \[
    7 \times \frac{5}{8} = \]

11. Multiply and simplify the answer as much as possible.
    \[
    5 \times \frac{3}{5} = \]

12. Multiply and give the answer as a whole number.
    \[
    990 \times \frac{2}{3} = \]

13. Multiply and give the answer as an improper fraction.
    \[
    7 \times \frac{5}{7} = \]
## Fractions of whole numbers I

1. Multiply and simplify your answer as much as possible.

   \[
   6 \times \frac{10}{15} = \frac{6}{1} \times \frac{10}{15} = \frac{10 \times 6}{15 \times 1} = \frac{60}{15} = 4
   \]
   Therefore, \(6 \times \frac{10}{15} = 4\)

2. Multiply and write your answer as a mixed number.

   \[6 \times \frac{5}{12} = 3 \frac{3}{4}\]

3. Multiply and give the answer as a mixed number.

   \[8 \times \frac{3}{40} = \frac{3}{5}\]

4. Multiply and give the answer as an improper fraction.

   \[4 \times \frac{21}{29} = 2 \frac{26}{29}\]

5. Multiply and give the answer as a mixed number.

   \[150 \times \frac{5}{9} = 83 \frac{1}{3}\]

6. Multiply and give the answer as a whole number.

   \[10 \times \frac{9}{10} = 9\]

7. Multiply and give the answer as a mixed number.

   \[50 \times \frac{5}{8} = 31 \frac{1}{4}\]

8. Multiply and write your answer as a mixed number.

   \[375 \times \frac{7}{10} = 262 \frac{1}{2}\]

9. Multiply and give the answer as a whole number.

   \[759,000 \times \frac{4}{5} = 607,200\]

10. Multiply and write your answer as a mixed number.

    \[7 \times \frac{5}{8} = 4 \frac{3}{8}\]

11. Multiply and simplify the answer as much as possible.

    \[5 \times \frac{3}{5} = 3\]

12. Multiply and give the answer as a whole number.

    \[990 \times \frac{2}{3} = 660\]

13. Multiply and give the answer as an improper fraction.

    \[7 \times \frac{5}{7} = 5\]
