

Name: Class:

Add intergers

1. Add $6 + 4 = 10$

Add $(-5) + (-2) = -7$

to calculate the sum of a positive and negative number
use the sign of the larger number in your answer
then subtract the expression

Add $(-9) + 4 =$

Add $5 + (-11) =$

Add $7 + (-2) =$

Add $(-2) + 8 =$

2. Find for each expression below

$50 + (-27) =$

$(-1) + 5 =$

$(-102) + (-39) =$

$(+12) + 6 =$

$(-10) + (-5) =$

$5 + 8 =$

$7 + 79 =$

$38 + (-59) =$

3. For each expression below, find the sum and choose the correct answer from the list

$(-47) + 30 =$

+ 77

+ 17

- 17

- 77

$(-780) + 889 =$

Name: Class:

Add intergers

1. Add $6 + 4 = 10$

Add $-5 + -2 = -7$

to calculate the sum of a positive and negative number
use the sign of the larger number in your answer
then subtract the expression

$(-9) + 4 = 4 - 9$

$9 > 4$ so, the answer
is a negative number.

$4 - 9 = -5$

$7 + (-2) = 7 - 2$

$7 > 2$ so, the answer
is a positive number.

$7 - 2 = +7$

$5 + (-11) = 5 - 11$

$11 > 5$ so, the answer
is a negative number.

$11 - 5 = -6$

$(-2) + 8 = 8 - 2$

$8 > 2$ so, the answer
is a positive number.

$8 - 2 = +6$

2. Find for each expression below

$50 + (-27) = +23$

$(-1) + 5 = +4$

$(-102) + (-39) = -141$

$(+12) + 6 = +18$

$(-10) + (-5) = -15$

$5 + 8 = +13$

$7 + 79 = 86$

$38 + (-59) = -21$

3. For each expression below, find the sum and choose the correct answer from the list

$(-47) + 30 =$

+ 77

+ 17

- 17

- 77

$(-780) + 889 =$
